

Problem Solving with ICT using WIX

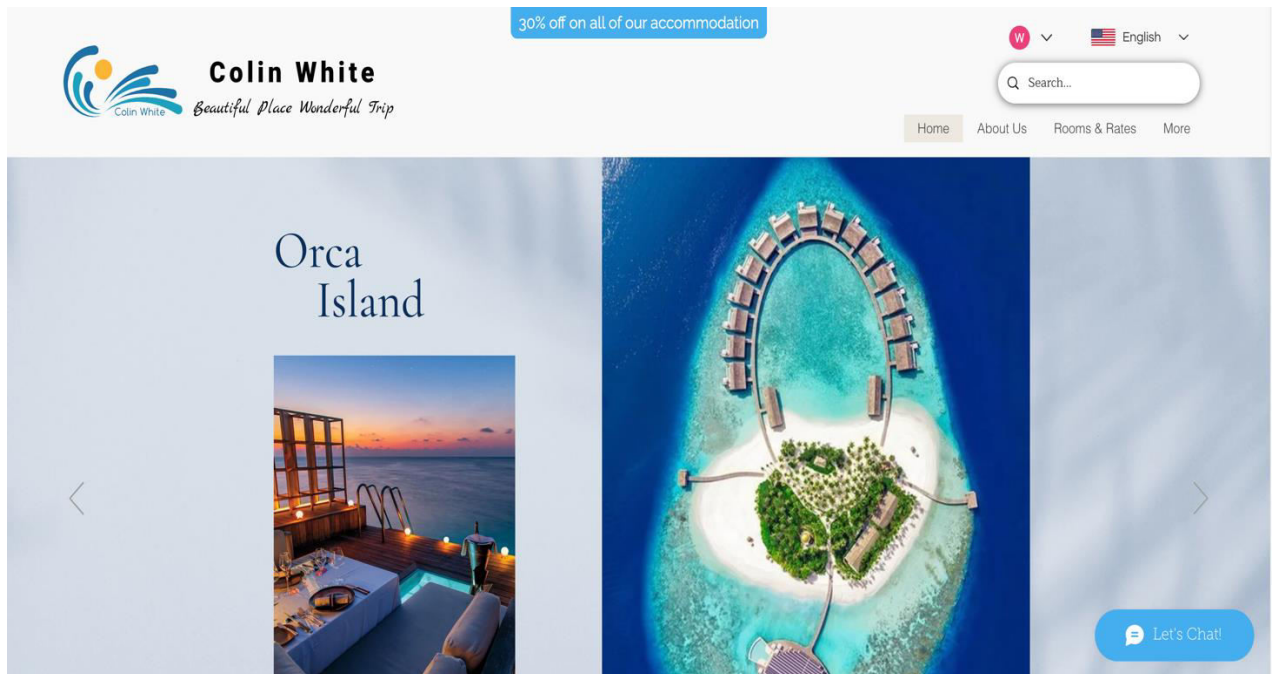

I did a case study as a group assessment which focus on business issues and solutions, implementing great tactics and concepts that can eliminate the problem that occurs in business. Using business skills and a designing tool to provide customers and users with better performances, functionalities, accessibilities, and conveniences that they experience through online or digital platforms. It shows how each tool and function play an essential role in a business that could facilitate the business process through the study of customer, competitors, and its business.

Business Scenario/Case Study: You have just joined a new company called White Sands Resorts. The company is owned by Jacqueline Sommelier who purchased 3 islands off the Queensland coast very near the Hamilton Island. Jacqueline has commissioned the building of chalets and 2 restaurants on each island. Each island is meant to carry a theme to attract different crowds i.e., groups, young couples, families, and older couples.

KingKong Western

Our restaurant provides western food with a variety of cocktails located at Colin White resorts on 3 islands (T-Rex, Daisukida and Orca Island) along the beach.

It is the best place to release stress, chill and relax with family, friends, and lovers.

Captivate your heart with the power of nature.

We have a promotion up to **50%** on all types of food.
